Projects

- **Book My Bus**

An intuitive online platform for bus reservations, providing users easy booking while enabling admins to manage routes, buses, and users.

Features:

- Admin management: Login, manage users, buses, and routes.
- User Convenience: Easy login, search, and booking process.
- Intuitive Design: User-friendly interface for seamless navigation.
- Route Exploration: Search buses by destinations and dates.
- Booking Control: Ticket booking, cancellation, and status check.
- Feedback Loop: Provide suggestions for service enhancement.

Tech Stacks:

Java | Spring Boot | RESTful API | MySQL | Project Lombok | HTML | CSS | JavaScript

Area of responsibilities:

Collaborated in designing user-facing frontend for bus reservation: crafted homepage, booking, cancellation, ticket status, and performed debugging.

It is a collaborative project built in a span of 5 days in a group of 5 members

- **Fabrica**

Emulating columbia.com, our clone sells quality outdoor gear and apparel for adventure seekers.

Features:

- Admin: Login/logout, manage products (CRUD).
- Users: Login/logout, signup for accounts.
- Shopping: Add to cart, view Cart page, secure checkout process.
- Filtering: Sort by name, price.
- Profile: Manage user profiles.

Tech stacks:

HTML | CSS | JavaScript | JSON-Server-API

Areas of responsibilities:

Led team, built profiles, Cart, Payment pages, and debugged software issues effectively.

It is a collaborative project built in a span of 5 days in a group of 5 members
